ABOUT ME

Motivated IT undergraduate passionate about software engineering, web development, and problem-solving. Interested in building responsive user interfaces, reliable backend systems, and full-stack applications. Experienced in developing practical applications through individual and team-based projects. Eager to contribute to development teams and build efficient, scalable, and user-friendly software solutions.

EDUCATION

SLIIT - 4th year undergraduate

- Bsc.(Hons) Information Technology specialization in Information Technology | 2023 - Present

Went to Royal College Colombo 07.

- Passed Advanced Level Examination in Bio Stream in 2021

COURSES & CERTIFICATIONS

- **Currently Following Foundation of Business Management Course at IBS campus**
- **Cisco Networking Academy**
  Successfully completed Industrial Networking Essentials Instructor-Led Course
  (Completed: 25 May 2026)
  Currently following Network and Cybersecurity Essentials Instructor-Led Course
- **Professional Development**
  Certificate Course in Road to Project Management (CAPM) SLIIT Professional Development Programs
- **Other Certifications**
  Certificate in Computer Awareness National Institute of Education
  (January 2018 – July 2018)
  Short Course in English for School Leavers – Distinct Pass | IHRA
  (March 2021 – June 2021)

PROJECTS

AI-Powered Knowledge Extraction and Multilingual Content Generation Framework
Role: Group
Technologies: Python, React, MongoDB

- Contributing to the development of a framework for extracting knowledge from long-form video content and generating multilingual content.
- Responsible for the Semantic Knowledge Fusion and Multilingual Content Generation component.

Student Learning Management System

Role: Group

Technologies: React, Node.js, MongoDB, Prizma

- Contributed to the login interface and student learning analysis functionality, including future prediction features.

Lost & Found Management System

Role: Group

Technologies: Node.js, React, MongoDB

- Contributed to the development of a charity management feature within the broader Lost & Found Management System.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, PHP, SQL
- Frontend Development: HTML5, CSS3, React.js, Responsive Web Design
- Backend Development: Python, Node.js, PHP, Backend Logic Implementation
- Databases: MySQL, MongoDB, Database Integration, CRUD Operations
- Tools & Platforms: Visual Studio Code, Git, GitHub, Figma
- Software Engineering: Object-Oriented Programming (OOP), Problem-Solving, Debugging, Version Control, Software Development Fundamentals

INTERNSHIP / WORK EXPERIENCE

SAP Basis Intern | CBL Group - December 2025 – June 2026

- Gained practical experience in enterprise systems, user access management, and role administration while strengthening problem-solving, analytical thinking, and teamwork skills.

Python Programming Developer (Virtual) - Decodelabs | Remote | 25 July 2026 – 25 August 2026

- To-Do List Application - Github
- Expense Tracker - Github
- General Knowledge Quiz Application - Github
- Password Generator - Github

SOFT SKILLS

- Teamwork & collaboration
- Time Management
- Communication skills
- Problem-solving

LANGUAGES

- English
- Sinhala
